PARKING GARAGE

Environmental contaminants including hydrocarbons and dry cleaning solvents (stoddard solvent, tetrachloroethene) have been identified in the soil and groundwater in the parking lot and under the foundation of the buildings along the 900 block of East Genesee St. All activities relating to the disturbance, handling, staging and on-site management of site soils and groundwater must be conducted under the direction and supervision of the Syracuse University Environmental Health and Safety Services Office. **The Environmental Health and Safety Services Office must be contacted prior to any activity on the site which will disturb site soils. (Daytime Call 315-443-4132, After hours Call 315-443-1234)**
