

Environmental contaminants including heavy metals, volatile organic compounds, and semi-volatile organic compounds have been identified in the soil on the Harrison Lot site as a result of historic site operations. All activities relating to the collection, handling, staging, and on-site transportation of site soils and groundwater must be conducted under the direction and supervision of the Syracuse University Environmental Health and Safety Services Office. The Environmental Health and Safety Services Office must be contacted prior to any activity on the site which will disturb site soils. (Reference call: 315-443-4128, after hours call 315-443-1234)
