

Environmental contaminants, including hydrocarbons, heavy metals, petroleum, and volatile organic compounds, have been identified in the soil and groundwater at the Warehouse site as a result of historic site operations. All activities relating to the disturbance, handling, staging and on-site management of site soils must be conducted in accordance with site specific "Warehouse Soil Management Plan". The Syracuse University Environmental Health and Safety Services Office must be contacted prior to any activity on the site which will disturb site soils to assist in ensuring the activity is performed in accordance with the site specific soil management plan. (Daytime Call 315-443-4132, After hours Call 315-443-1234)
