DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This product is not to be used as a terminal sterilant/high-level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body.

CLEANING: Use one or more wipes, as necessary, to wet surface sufficiently and to thoroughly clean the surface.
DISINFECTING: To disinfect hard, non-porous surfaces, use one or more wipes, as necessary, to thoroughly wet the surface to be treated. Treated surface must remain visibly wet for one minute to achieve complete disinfection of all pathogens listed on this label. For visibly soiled surfaces, clean before following disinfecting instructions. Allow surfaces to air dry. For surfaces that may come in contact with food, a potable water rinse is required.

DISPENSING INSTRUCTIONS:
To Dispense Wipes: Open lid, remove entire cover, remove and discard seal. From center of wipes roll pull up a corner of the wipe, twist it and thread it through the hole in the container cover. Pull through about one inch. Replace cover tightly. Pull out first wipe and tear off at a 45° angle. Remaining wipes feed automatically, ready for next use. When not in use, keep the tip of the exposed wipe inside the well in the cover, and the lid snapped closed.

***KILLS HIV-1, HBV AND HCV ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD / BODY FLUIDS** in health care settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces / objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of HIV-1 associated with AIDS, HBV and HCV.

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1, HBV AND HCV ON SURFACES / OBJECTS SOILED WITH BLOOD / BODY FLUIDS:

- **Personal Protection:** When handling items soiled with blood or body fluids, use disposable latex gloves, gowns, masks and eye coverings.
- **Cleaning Procedure:** Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of Medline Micro-Kill One Germicidal Alcohol Wipes.
- **Contact Time:** Allow surface to remain wet for 1 full minute.
- **Disposal of Infectious Materials:** Blood and other body fluids should be autoclaved and disposed of according to local regulations for infectious waste disposal.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Always store this product and all pesticides in the original container. If a leaky container must be contained within another, mark the outer container to identify the contents. Protect from extreme heat or cold.
